THANK YOU

End of the year - time for rest, reflection and looking back.

Another unusual year has been completed, confronting us with global, political and numerous other challenges. In these turbulent times, it is all the more important to end 2022 with **confidence for the future** by joining forces, trusting each other and building strong partnerships. We are proud to have managed these challenges thanks to our **reliable partners** and would like to express our **sincere thanks**.

We look forward to the coming year with optimism and wish you a **happy holiday** season and a **successful 2023**.

Goji berries: Changed cadmium limits

New regulation regulates
Cadmium content in fresh weight

Goji berries are characterized by their slightly **sour-sweet, tart-fruity, aromatic flavor**, which makes them an ingredient in mueslis, salads, dietary supplements or tea. They are also very popular in **traditional Chinese medicine**, where they have been used as a remedy for a long time.

Our goji berries are gently sun-dried, which ensures a **raw food quality** and favors the preservation of valuable nutrients.

With the regulation VO (EG) 1881/2006 from 02.28.2022 new **cadmium limits** came into force. Since then, a maximum content of 0.02 mg/kg cadmium in fresh weight has been set for fruit vegetables.

Based on our many years of **experience** with this product and our **analytical monitoring**, we can confirm that, taking into account the drying factor, we are also able to comply with the new limits for our dried goji berries from the Tibetan plateau.

In our assortment are

Organic Goji berries

Origin:

Tibetan Plateau
