

**Content:**

Comprehensive organic coconut range for retail and further processing

**The organic coconut -  
natural, versatile, valuable**

Organic coconut products impress with their natural properties and wide range of applications in the food and cosmetics industry:

**Organic coconut oil** is heat-stable, has a long shelf life and is rich in medium-chain fatty acids, which are particularly quickly utilized by the body.

**Organic coconut flour** is gluten-free, high in protein and high in fiber. It is an excellent alternative to cereal flour in baked goods, bars or low-carb products.

**Organic coconut milk** and **organic coconut cream** offer a plant-based, lactose-free option for vegan cuisine.

**Organic coconut sugar** scores highly with its low glycaemic index and caramelly taste - a popular alternative to conventional sugar.

**Organic grated coconut** and **organic chips** are ideal for muesli, snacks or baked goods.

All products are available on request. We are happy to provide information about packaging units and availability. All products can be obtained **Fairtrade** and/or **Naturland** certified on request.
